

Meeting Minutes — Note (Sept 16, 4:00 PM)

Attendees

Present: John, Hayden, Alexander, Travis

Absent: Maddox (no votes taken)

Key Updates

Accounts: Most members created Selink accounts; Travis still needs to. Maddox likely has one—confirmation pending.

Upcoming Meeting: Daniel meeting set for Monday at 12:00 PM; all attendees tentatively confirmed.

Week 2 Update: Submitted (all sections completed).

Upcoming Critique: Expected next week; Storm to provide details (email or Monday discussion).

Project Proposal — Personnel Section

Task: Begin proposal with focus on team skills, gaps, and plans to acquire needed knowledge.

Roles: Instructor — Storm; Supervisor — Daniel (to be confirmed/justified in proposal).

Data Collection: Questionnaire to gather team skills will be sent via email; no strict deadline.

Discussion — Preparation for Daniel Meeting

Objective: Clarify project scope, deliverables, constraints, and resources.

Initial Assumptions:

Likely low-voltage lab-scale environment simulating high-voltage fault conditions.

Access to relays/equipment may require external facilities/partners due to high costs.

Audience may be students; HMI and safety implications depend on target users.

Risks/Concerns:

Unclear whether Daniel is the actual sponsor vs. a subject-matter expert.

Potential ambiguity in project definition and timeline; need explicit guidance to avoid scope drift.

Proposed Question Themes for Daniel

Scope & Outcomes: What problem are we solving? What is the expected final deliverable?

Technical Focus: What does “relay coordination and testing” mean for this project? What systems/equipment are in scope?

Resources & Facilities: What hardware/software and lab/facility access will be provided? Any past similar projects to reference?

Constraints: Required standards, specific components/vendors, timelines/deadlines.

Success Criteria: How will success be measured?

Scope Boundaries: Anything explicitly out of scope?

Decisions

Treat Storm as Instructor; treat Daniel as Supervisor for now (to confirm on Monday).

Proceed with preparing a concise question list for Daniel; avoid overly long lists.

Action Items

Follow up with Maddox to confirm Selink account status. Owner: Speaker 0

Create Selink user account. Owner: Travis (Speaker 3)

Send skills questionnaire to team (Maddox, Alexander, Travis). Owner: Speaker 0

Draft concise question list for Daniel meeting. Owner: Team (lead: Speaker 0)

Next Steps

Await Storm's guidance on the critique.

Conduct Monday meeting with Daniel; refine project scope and resource plan based on answers.
